INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference FWA3-41	FOR FURTHER ACTION	See Form PCT/IPEA/416	
International application No.	International filing date (day/month/year)	Priority date (day/month/year)	
PCT/JP2004/005484	16.04.2004	17.04.2003	
International Patent Classification (IPC) or nati	onal classification and IPC		
Applicant SHARP KABUSHIKI KAISH	IA.		
This report is the international preling under Article 35 and transmitted to the content of		s International Preliminary Examining Authority	
2. This REPORT consists of a total of		ing this cover sheet.	
3. This report is also accompanied by Al	NNEXES, comprising:		
a. (sent to the applicant and	to the International Bureau) a total of 8	sheets, as follows:	
I IXI '	,	amended and are the basis for this report and/or Rule 70.16 and Section 607 of the Administrative	
		onsiders contain an amendment that goes beyond an item 4 of Box No. I and the Supplemental	
	Bureau only) a total of (indicate type and numl	ber of electronic carrier(s))	
		, containing a sequence listing and/or tables	
related thereto, in computer Section 802 of the Administ		lemental Box Relating to Sequence Listing (see	
4. This report contains indications relation	ng to the following items:		
Box No. I Basis of the	report		
Box No. II Priority			
Box No. IV Lack of unit	Box No. IV Lack of unity of invention Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;		
Box No. V Reasoned st	atement under Article 35(2) with regard to nov l explanations supporting such statement	velty, inventive step or industrial applicability;	
Box No. VI Certain doct	uments cited		
Box No. VII Certain defe	cts in the international application		
Box No. VIII Certain obse	rvations on the international application		
Date of submission of the demand	Date of completion of	this report

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/JP2004/005484

Во	x No. I	V Lack of unity of invention
2.	This	In response to the invitation to restrict or pay additional fees the applicant has: restricted the claims. paid additional fees. paid additional fees under protest. neither restricted the claims nor paid additional fees. This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees. Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is: complied with. not complied with for the following reasons: I. Claims 1 to 6 pertain to a device for multiplexing a main image, a thumbnail image and three-dimensional control information.
		II. Claims 7 to 10, 12 to 18 and 20 to 23 (claims 11 and 19 were deleted by the amendments dated 17 February 2005) pertain to devices and/or programs for determining whether or not the parallax of a three-dimensional image is within a prescribed parallax range.
		Therefore, the two groups of inventions in question cannot be considered to be a single group of inventions that are so linked as to form a single general inventive concept.
4.	Cons	equently, this report has been established in respect of the following parts of the international application: all parts. 1-6, 7-10, 12-18 and 20-23 (claims 11 and 19 were deleted by the parts relating to claims Nos. the amendments)

With regards to the inventions that are set forth in claims 1 to 6, neither the device for creating three-dimensional images, which is equipped with a multiplexing unit for multiplexing a main image, a thumbnail image and three-dimensional control information, nor the device for reproducing three-dimensional images, which is equipped with a reverse multiplexing unit for separating the main image, the thumbnail image and the three-dimensional control information as well as a thumbnail generation

International application No.
PCT/JP2004/005484

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

unit for outputting a thumbnail image that is obtained by superposing a symbol, which indicates that the image is a three-dimensional image, over the thumbnail data, is disclosed in the documents that are cited in the international search report (in particular, refer to documents 1 to 4); furthermore, the inventions in question would not have been obvious to a person skilled in the art.

With regards to the inventions that are set forth in claims 7 to 10, 12 to 18 and 20 to 23, the feature of providing a parallax range detection means for detecting the parallax range that is appropriate for stereoscopic viewing, a parallax detection means for detecting the parallax of the three-dimensional image, a determination means for determining whether or not the aforementioned parallax of the aforementioned three-dimensional image falls within the aforementioned parallax range and a notification means for notifying a user, and then further configuring so that the aforementioned notification means notifies the user in cases when the aforementioned determination means determines that the aforementioned parallax does not fall within the aforementioned parallax range is not disclosed in any of the documents that are cited in the international search report, and would not have been obvious to a person skilled in the art. (In addition, claims 11 and 19 were deleted by the amendments dated 17 February 2005.)
